### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

Claims 41-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to reasonably convey the concept of deleting another viral gene in addition to E1 and/or E3. The cited passage spanning pages 7-8 does vaguely refer to "one or more appropriate deletions" in a viral genome, but nowhere in the specification are any blazemarks pointing to deletion anywhere other than E1 or E3. Therefore it is concluded that these claims involve new matter.

## **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Application/Control Number: 10/046,938

Art Unit: 1648

Claims 24-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 4-7, 9-12 of U.S. Patent No. 6,001,591. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to bovine adenovirus expression vectors with a deletion/insertion in the E1 region. Adding the recitation "replication-defective" to the claims does not make this invention distinct from the previously patented products, because E1 mutant adenoviruses are usually replication-defective.

Claims 24-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 4, 6, 7, 9-21, 23, 24, 26 of U.S. Patent No. 6,086,890. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to recombinant bovine adenoviruses with a deletion/insertion in the E1 region. Adding the recitation "replication-defective" to the claims does not make this invention distinct from the previously patented products, because E1 mutant adenoviruses are usually replication-defective.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary E. Mosher, Ph.D. whose telephone number is 571-272-0906. The examiner can normally be reached on M-T and alternate F.
